

A vision for future systems development

An Envoy Advanced Technologies Software Systems Development Overview

Envoy designs and develops custom software applications for the **web, enterprise, and mobile**:

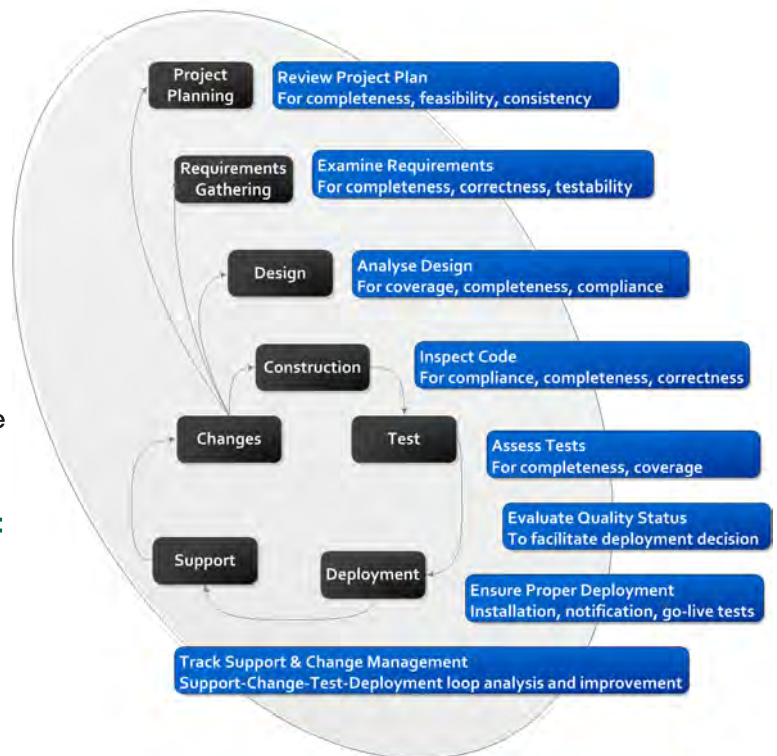

- ✓ Corporate software applications
- ✓ Line of business applications
- ✓ Consumer applications
- ✓ Transactional and reporting applications
- ✓ Medium and large scale solutions

Our Key Strengths:

- ✓ A **high-quality development** methodology
- ✓ A **collaborative** development process
- ✓ A team of **experienced, commercially-aware** developers

Complete Software Development Lifecycle:

- ✓ Analysis
- ✓ Design
- ✓ Development
- ✓ Operation
- ✓ Ongoing support
- ✓ Consulting & project completion for existing products started in-house or with other vendors

Fully Managed Hosting

Envoy offers fully managed application hosting for the software we develop. We take **responsibility** for seeing our work through to **successful operation**.

Our development and operations teams work closely together across the whole development lifecycle. This ensures the most **efficient** path to delivering software up-and-running to our clients and the most **responsive** support once the system is in production.

We provide:

- ✓ Secure dedicated hosting facilities
- ✓ Public-facing internet sites
- ✓ Private, secure intranet/extranet sites

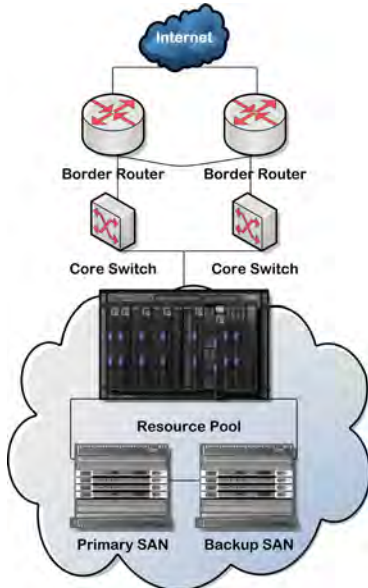

API and SOAP / XML Experts

Envoy has a range of expertise in not only developing but interfacing with a range of well-known APIs in the travel industry and beyond, including:

- ✓ Amadeus
- ✓ Navitaire
- ✓ HitchHiker
- ✓ Everbread
- ✓ Booking.com
- ✓ Mondial Assistance

Putting It All Together For Our Clients

Envoy offers complete technology solutions, from modern optimised front ends through to enterprise grade hosting and networks.

Our Web Development and RIA Experience Includes:

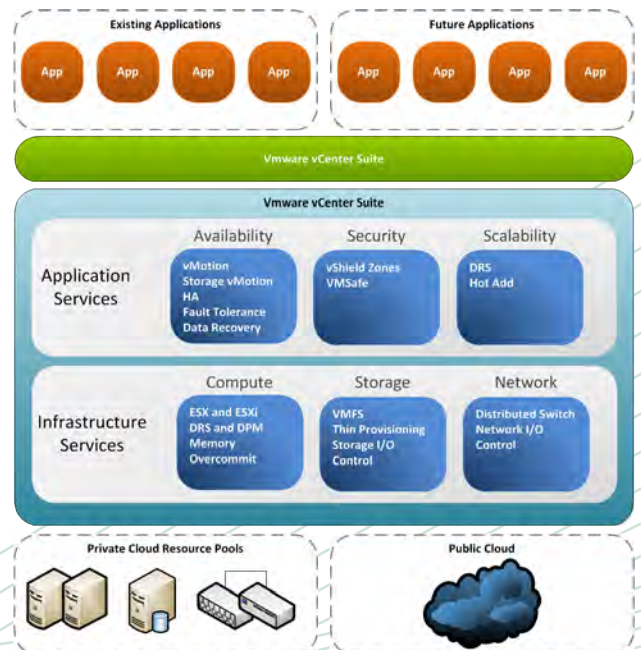

- ✓ Adobe Flash and Actionscript
- ✓ Silverlight
- ✓ WPF
- ✓ iPhone and iPad
- ✓ Android
- ✓ jQuery and Application-grade Javascript
- ✓ Search Engine Optimisation (SEO)
- ✓ Google Analytics, AdWords, and Website Optimizer
- ✓ Umbraco content management
- ✓ Payment gateway integration (including **PayPal, Payflow Pro, SecurePay, eWAY, and POLi**)

Technology Envoy Uses

Envoy is a **Microsoft Partner**, with many years of commercial experience in Microsoft technologies.

Our Microsoft expertise includes:

- ✓ ASP.NET
- ✓ IIS 7
- ✓ Microsoft .NET Framework
- ✓ MVC3
- ✓ MSMQ message queuing
- ✓ SQL Server
- ✓ SQL Server Reporting Services
- ✓ Active Directory

Envoy's hosting solutions use VMware vSphere™ to holistically manage hardware resources and provide application service level controls, creating dramatically simplified cloud infrastructures.
